Record & Review

Image-based

AI-based Intelligence feature to identify exam takers using unfair methods by analyzing user images captured after system configurable time interval.

Video-based

AI-based Intelligence feature to identify students who are at risk and need action through analyzing offline videos of exam shared with proctors after exam delivery.

Live Proctoring

Exam monitoring through live streaming video for identifying exam takers using unfair methods, with the option of cloud storage for further processing and validation.

Assist proctor by flagging images with potential malpractice

- **No face detected** in the frame
- **Multiple faces detected** in the frame
- **Face mismatch** with candidate's registered picture
- **External objects -** Books, devices used in the frame
